My phone # is (b) (6)

I am more than happy to discuss any questions you have as far as our security goes it's pretty basic security pretty much just me out here and sometimes one other guy but he is here and there. we pretty much just drive around the property checking fence lines and gates.

I can set up a meeting with fabricators if you'd like when you guys are on site. As well as tri-star north

James-

I would like to have a quick chat with you about what the existing evening security looks like and how we can have our contracted security guard work cooperatively with what Spokane Recycling has.

I also wanted to discuss Spokane Recycling's communication plans with the current tenant (metal fabrications shop) and to outline how we normally communicate with active tenants on sites we work on.

Let me know how best to reach you and/or whether there is another POC more appropriate to discuss these two matters.

Email: stanfield.brooks@epa.gov

I think I heard you say that you have 6-7 acres on the southwestern side of the property that you agree would be appropriate for us to set up for parking, office trailers, storage, and laydown for equipment and supplies. I'm sure we'll be able to work with that, thank you.

We will continue to coordinate as our plans become more fully cemented.
